

Panoramax traffic-sign country mapping

Reconciled visual catalogue for the German, French, Dutch, Swiss and Belgian columns in the supplied mapping CSV.

Source rows	225	CSV columns	YOLO, DE, FR, NL, CH, BE
Reconciliation	FR, NL and BE model-linked selection entries match the corresponding CSV codes. One prefix typo was normalized: Fr:A8 to FR:A8.	Generated	2026-09-16
Artwork sets	DE 111, FR 114, NL 111, BE 115. The country manifests include reviewed catalog extras beyond model-linked artwork.	CH artwork	No CH manifest or artwork directory is present in this repository; CH codes remain text-only.

Source and interpretation

Each mapping row below is retained in source order. A country cell shows the real transparent PNG when the CSV code resolves to a checked-in manifest asset. Missing cells preserve the CSV code and state why no image is shown. License and provenance details for every rendered asset appear in the appendix.

German artwork is indexed by shared/tsr/sign-pictograms/manifest.json. France, the Netherlands and Belgium use their national manifest.json and selection.json files. The German set has no separate top-level selection.json. The CSV is the supplied Panoramax road_signs_mapping.csv with the FR prefix correction noted above.

Rendered asset	Real checked-in PNG, with code, license and mapping status.	No artwork	CSV code retained, but no corresponding asset is available in the applicable manifest.

Artwork provenance and license

The appendix lists every unique manifest artwork referenced by a CSV row with its source country, code, model classes, declared license, attribution requirement, artist, Commons source and checked-in PNG hash. The source page link is the permanent Commons page recorded by the manifest.
