

Panoramax traffic-sign country mapping

Reconciled visual catalogue for the German, French, Dutch, Swiss and Belgian columns in the supplied mapping CSV, including ASTRA provenance for Swiss artwork.

Source rows	225	CSV columns	YOLO, DE, FR, NL, CH, BE
Reconciliation	FR, NL, CH and BE model-linked selection entries match the corresponding CSV codes. Country prefixes are normalized to uppercase.	Generated	2026-09-17
Artwork sets	DE 111, FR 114, NL 111, CH 116, BE 115. Manifest extras remain catalog-only when they have no source model class.	CH artwork	116 ASTRA source-preparation assets. 23 mapped CH code(s) have no checked-in artwork in the current scope. 4.88 and 4.90 remain excluded by owner decision.

Source and interpretation

Each mapping row is retained in source order. A country cell shows the real transparent PNG when the CSV code resolves to a checked-in manifest asset. Missing cells preserve the CSV code and state why no image is shown. License and provenance details for every rendered asset appear in the appendix.

German artwork is indexed by shared/tsr/sign-pictograms/manifest.json. France, the Netherlands, Switzerland and Belgium use their national manifest.json and selection.json files. The German set has no separate top-level selection.json.

Swiss CH artwork is derived from ASTRA's official [traffic-sign archive](#). The appendix records each source archive, source member and SHA-256 hash, along with the local conversion step. ASTRA's public site confirms that the files are available for download, but its copyright notice states that downloading or copying transfers no rights and that reproduction requires prior written permission. The PDF therefore records CH as source-preparation-only pending explicit redistribution clearance. This status does not prevent internal evaluation or provenance documentation.

Artwork provenance and license

This appendix lists every unique manifest artwork referenced by a CSV row with its country, code, model classes, declared license or provenance status, attribution requirement, artist or source archive, source member, source page and checked-in PNG hash. For CH, source availability is not treated as redistribution permission.

Country	Code	CSV model class(es)	License / provenance	Attribution / artist	Source archive / member	Source page	PNG SHA-256
